

Press Release from HKS Dreh-Antriebe GmbH

DIAM 2016 – Deutsche Industriearmaturen Messe

Munich (Germany) September 14/15th, 2016 - In September 2014 the DIAM was founded. The trade show specialized in industrial valves was held for the first time in Munich. The conclusion: "We will be back!" and that is the case on September 14th and 15th this year.

Then it will be even more visitors from the neighbor countries, who will find their way to the "1st German trade fair for industrial valves, seals, drive and system technology".

As an exclusive forum for industrial valves, the DIAM is a well established event now in the exhibition calendar. With its individual concept, it offers the ideal platform for the presentation of products and at the same time a really strong communication network in the unique atmosphere of an industrial monument. Here you will meet professionals for professionals. Short distances and a wide range of products and lecture program bring you together with your customers, suppliers and partners.

HKS will be representing its product portfolio in the culture hall in Munich!

Please visit us at booth A24!
